Product Description

IP Electroplate Portability Metal Optical Frame Glasse Model 3802

Product Description:

The metal frame is constructed with a metal support system that provides maximum stability and safety. The metal frame assembly ensures that the glasses will not break or deform easily, even with frequent use. The metal construction also gives the glasses a sleek, modern look that is suitable for any occasion.

One of the most notable features of this product is its translucency. The metallic glue frame has a translucent quality that gives it a unique and distinctive look. This quality also makes it easy to match with any outfit or style, as the glasses will blend seamlessly into your look. The metal frame is also very lightweight, making it ideal for long periods of wear. You will be able to wear these glasses all day long without feeling any discomfort or nervousness. This is especially important for those who need prescription glasses, as it ensures that the glasses don't put any undue strain on the ears or nose.
