Product Description

1.60 Photochromic HMC AR Coating Ophthalmic Lenses For Block EMI

Product Description:

Our 1.60 Aspheric Lens offers excellent UV protection with a rating of UV-1/UV-2. This means that your eyes are protected from harmful UV rays that can cause damage to your vision. Whether you're spending time outdoors or indoors, you can rest assured that your eyes are safe from UV rays.

In addition, our single vision lens is impact-resistant, making it a durable and reliable option for individuals who lead an active lifestyle. You won't have to worry about your lens cracking or breaking easily, which gives you the freedom to participate in any activity you choose.

Our lens also features a water-repellent coating that helps to keep your vision clear in wet or rainy conditions. This coating prevents water droplets from sticking to the lens surface, which can cause distortions and reduce visual clarity. With our water-repellent coating, you can maintain clear and sharp vision no matter what the weather conditions are.
