Product Description

1.67 Photochromic Anti Blue Light AR Coating Single Vision Lenses

Product Description:

One of the standout features of our single vision lens is its UV protection. With a rating of UV-1/UV-2, this lens provides essential protection from harmful UV rays, helping to preserve the health of your eyes and prevent long-term damage. Whether you're spending time outdoors or simply going about your day-to-day activities, our single vision lens will keep your eyes safe and comfortable. In addition to UV protection, our single vision lens also comes with a range of coatings to enhance its performance. The AR coating, for example, provides superior scratch-resistance and durability, ensuring that your lenses stay in top condition for longer. Meanwhile, the green color of the coating adds a stylish touch to your lenses, making them a fashionable accessory as well as a functional one. So if you're looking for a high-quality, reliable single vision lens that provides UV protection, scratch-resistance, and superior visual performance, look no further than our 1.67 Aspheric Lens. With its advanced features and stylish design, it's the perfect choice for anyone who wants the best possible vision, no matter what their prescription may be.
