- Coating: HMC+AR
- Index Of Refraction: 1.738
- Abbe Value: 32.5
- Highlight: 1.74 HMC, Single Vision Lenses, hmc + emi lens

## Product Description

### 1.74 HMC AR Coating Ophthalmic Single Vision Lenses For Block EMI

#### Product Description:

With its thin design, this Single Vision Lens is perfect for people who want a sleek and modern look for their eyewear. Despite its slim profile, it still provides excellent optical performance and clarity.

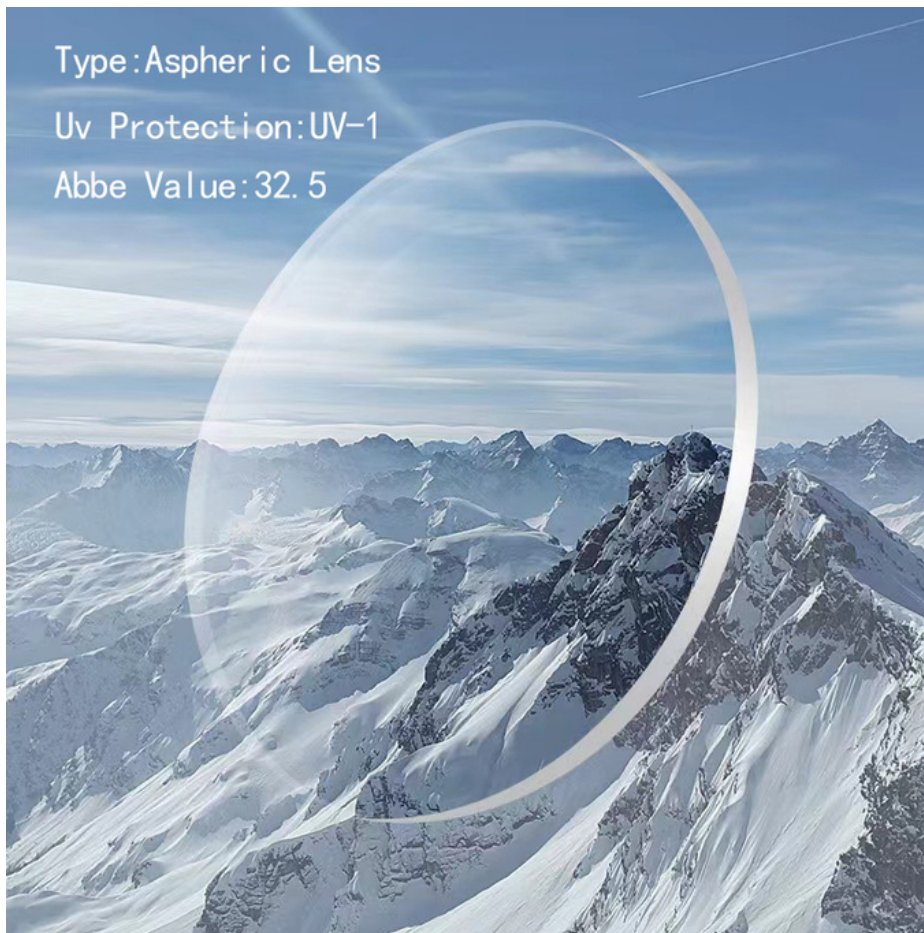

This lens is available in a wide range of prescriptions to suit your specific needs. Whether you have nearsightedness or farsightedness, our Single Vision Lens can provide you with the correct prescription and help you see clearly.

Our Single Vision Lens also comes with UV-1 protection, which blocks harmful UV rays from the sun. This is important because prolonged exposure to UV rays can cause eye damage and increase the risk of developing cataracts or other eye problems.

Moreover, the index of refraction of our Single Vision Lens is 1.74, which means that it has a high level of light-bending power, allowing it to provide sharper and clearer vision than lenses with a lower index of refraction.

In summary, our Single Vision Lens is the perfect solution for people who want a durable, thin, and high-quality lens that provides excellent optical performance and UV protection. Don't settle for anything less than the best when it comes to your vision. Choose our Single Vision Lens today and experience the difference for yourself.
