Product Description

1.74 Anti Blue Light AR Coating Ophthalmic Single Vision Lenses

Product Description:

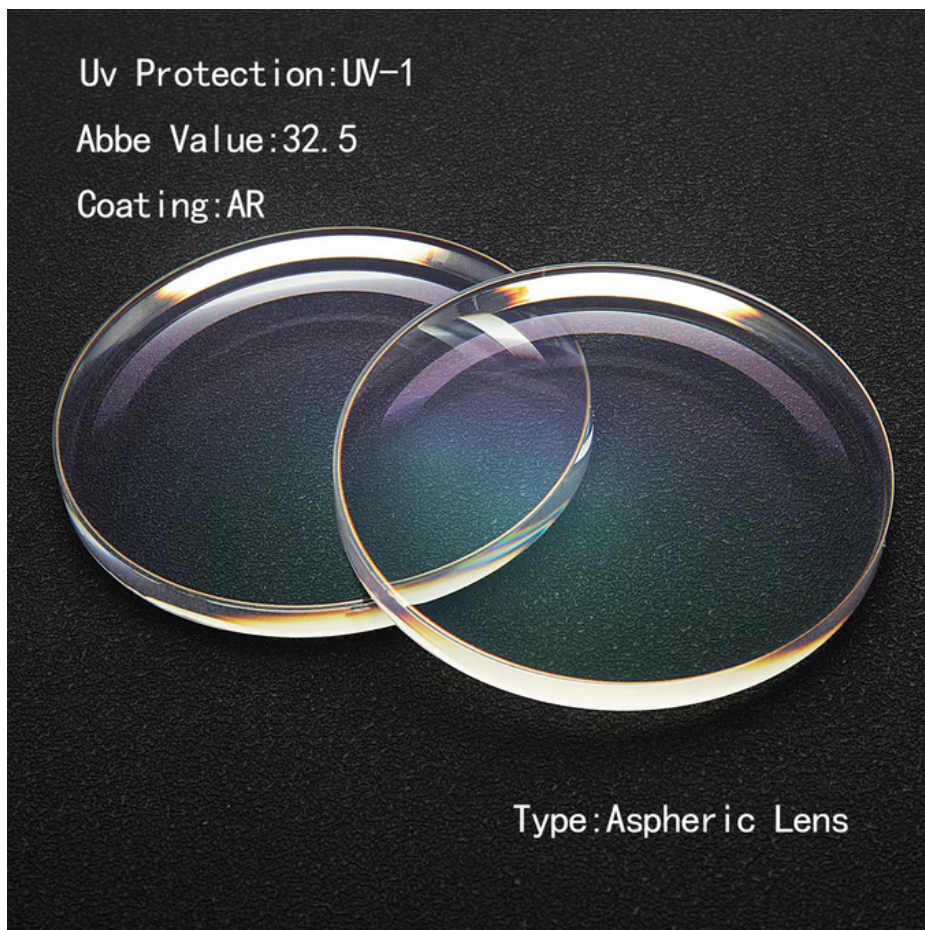

Our single vision lens is perfect for anyone who needs correction for distance or reading. With its aspheric design, the lens provides a wider field of vision and reduces distortion, giving you a more natural view of the world around you. And its thin profile means that it won't weigh you down or feel heavy on your face.

Our Model Number 1.74 Aspheric Lens is available for a wide range of prescriptions, making it easy to find the right fit for your needs. Whether you have a mild or strong prescription, our lens can accommodate your needs and provide you with clear and comfortable vision all day long.

But that's not all – our single vision lens also offers UV-1 protection, which blocks out harmful UV rays from the sun. This is especially important for those who spend a lot of time outdoors, as UV rays can cause damage to your eyes and increase your risk of developing eye diseases.

So why choose our Model Number 1.74 Aspheric Lens for your single vision needs? With its advanced technology, wide range of prescriptions, and UV-1 protection, it's the perfect choice for anyone who wants clear and comfortable vision. And with its thin profile and aspheric design, you'll hardly even notice that you're wearing glasses!
