Product Description

CR-39 1.49 UC HC Optical Lens White Resin Single Vision Lenses

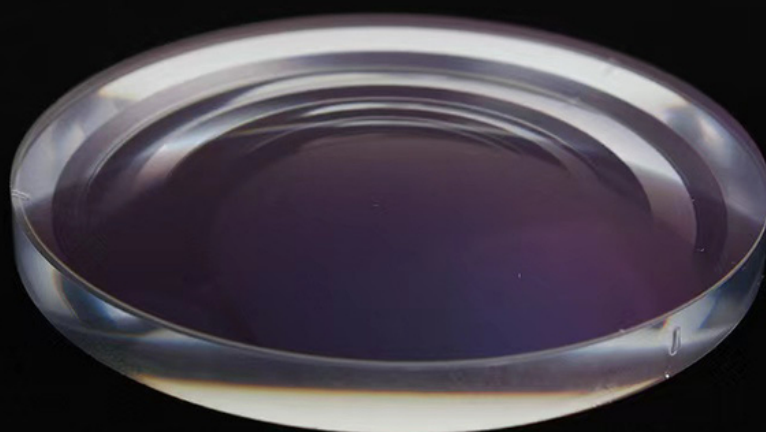

Product Description:

One of the key features of our single vision lens is its impact resistance. This means that our lens is designed to withstand impact and protect your eyes from potential harm. Whether you're playing sports or working in a high-risk environment, our lens will help keep your eyes safe and protected.

Another important feature of our single vision lens is its UV protection. Our lens provides UV-1 protection, which helps block harmful UV rays from reaching your eyes. This is especially important if you spend a lot of time outdoors, as prolonged exposure to UV rays can lead to a range of eye problems, including cataracts and macular degeneration.

Our single vision lens is available in a range of prescriptions, making it suitable for a wide variety of users. Whether you're nearsighted or farsighted, our lens can be tailored to meet your specific needs. Plus, our lens is available in a thin profile, which means it won't add unnecessary bulk to your glasses.
