Product Description

Product Description:

The benefits of our SINGLE VISION LENS are numerous. First and foremost, our lens is water-repellent, meaning it will repel water and resist smudging. This feature is particularly useful for those who live in rainy or humid climates or spend a lot of time outdoors. Additionally, our lens is made of polycarbonate, which is a highly durable and impact-resistant material. This means that our SINGLE VISION LENS is less likely to crack or shatter upon impact, making it a safer choice for active individuals or those who work in hazardous environments. Our SINGLE VISION LENS also has a high index of refraction, which means that it is thinner and lighter than other lenses on the market. This makes it a more comfortable and aesthetically pleasing choice for those who require corrective lenses. Whether you are looking for a reliable and durable lens for everyday use or need a lens that can withstand the rigors of an active lifestyle, our SINGLE VISION LENS is an excellent choice. With its water-repellent coating, high index of refraction, polycarbonate material, impact resistance, and comfortable base curve, you can trust that our SINGLE VISION LENS will meet all of your vision needs. Order your SINGLE VISION LENS today and experience the difference for yourself!

FAQ:

Here are the frequently asked questions and answers for VOLGTLANDER's 1.59 PC Block Blue Ray Lenses:

Q: What is the brand name of these lenses?

A: The brand name of these lenses is VOLGTLANDER.

Q: What is the model number of these lenses?

A: The model number of these lenses is 1.59 PC Block Blue Ray Lenses.

Q: Are these lenses suitable for those with high prescriptions?

A: Yes, these lenses are suitable for those with high prescriptions. They have a high refractive index, which means they are thinner and lighter than lower index lenses.

Q: Can these lenses be used for both distance and reading?

A: These lenses are single vision lenses, which means they are designed for either distance or reading, but not both. You will need to choose the appropriate lens for your needs.
