## Product Description

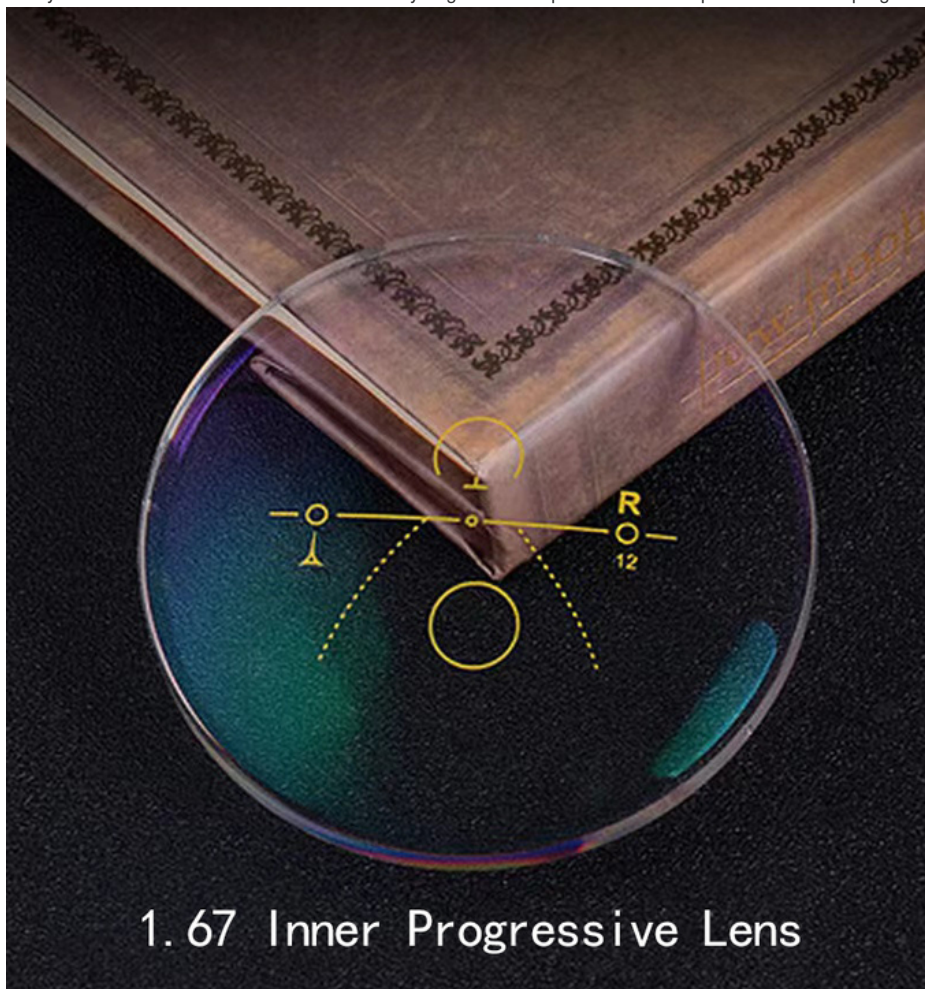

### Anti Reflective Resin 1.67 Inner Progressive Lens Scratch Resistant

#### Product Description:

One of the standout features of our progressive lens is its adaptability, which makes it comfortable to wear. Its adaptable design ensures that the wearer can easily adjust to different distances without any discomfort. This is because our product is made of high-quality materials that are both durable and comfortable. We understand that wearing eyeglasses can be uncomfortable, but with our progressive lens product, you can enjoy maximum comfort.

Our progressive lens is suitable for those who need a prescription range from single vision to progressive. This means that regardless of your prescription, our progressive lens can cater to your needs. Our product is available in clear color, which means that it will not affect the color of your surroundings. This makes it perfect for individuals who want to enjoy clear vision without any color distortion.

Another feature of our progressive lens product is its Abbe value of 32.0. The Abbe value refers to the amount of chromatic aberration that occurs when light passes through the lens. Our progressive lens has an Abbe value of 32.0, which means that it provides excellent clarity and minimal distortion. This ensures that you get the best possible visual experience with our progressive lens product.
