Product Description

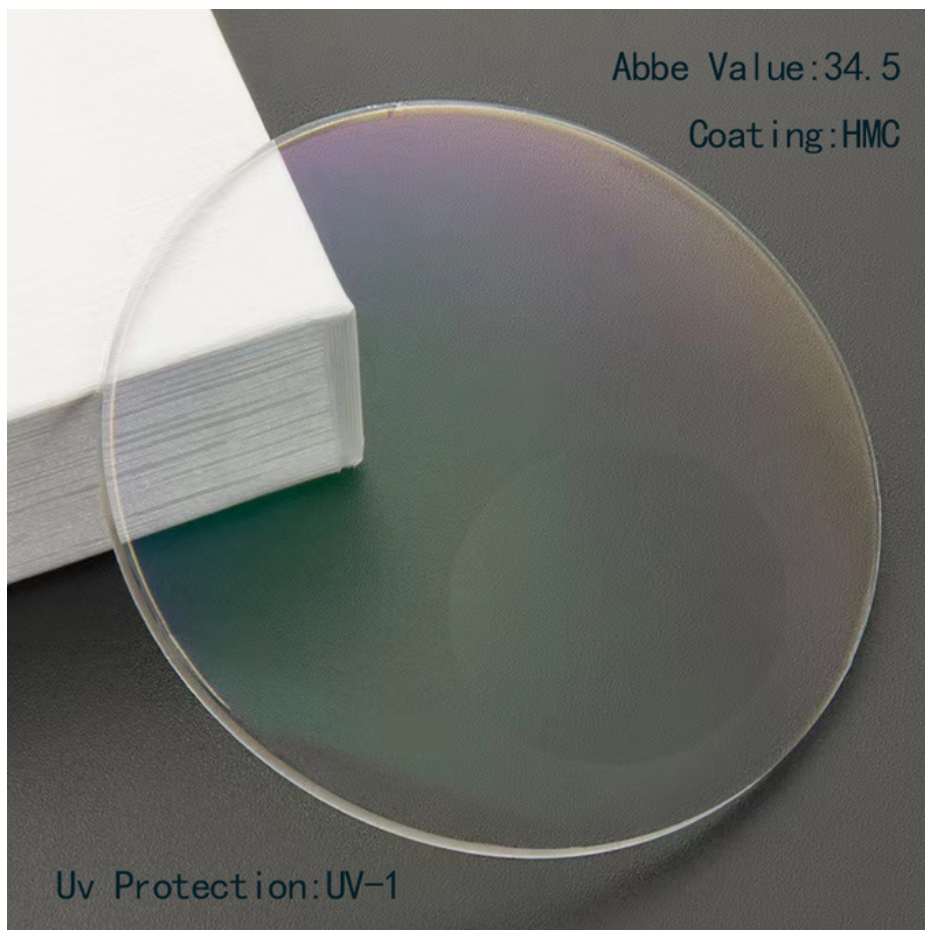

Resin 1.56 HMC Coating Round Top Bifocal Quality Lens Customized

Product Description:

Our Multifocal Progressive Lens is designed with UV-1 protection, which blocks harmful UV rays from the sun. This feature not only protects your eyes from potential harm, but also ensures that you can enjoy your outdoor activities without any discomfort or glare. With an Abbe Value of 34.5, our Multifocal Progressive Lens is one of the best lenses on the market. The Abbe Value measures the dispersion of light, which means that the higher the value, the less chromatic aberration you'll experience. This means that our lenses provide you with clear, sharp vision, no matter where you are or what you're doing.

Our Multifocal Progressive Lens is also highly adaptable, ensuring maximum comfort for the wearer. This is particularly important for those who need to use their glasses for extended periods of time. Our lens is designed to fit your unique needs, providing you with the best possible prescription range.
