Product Description

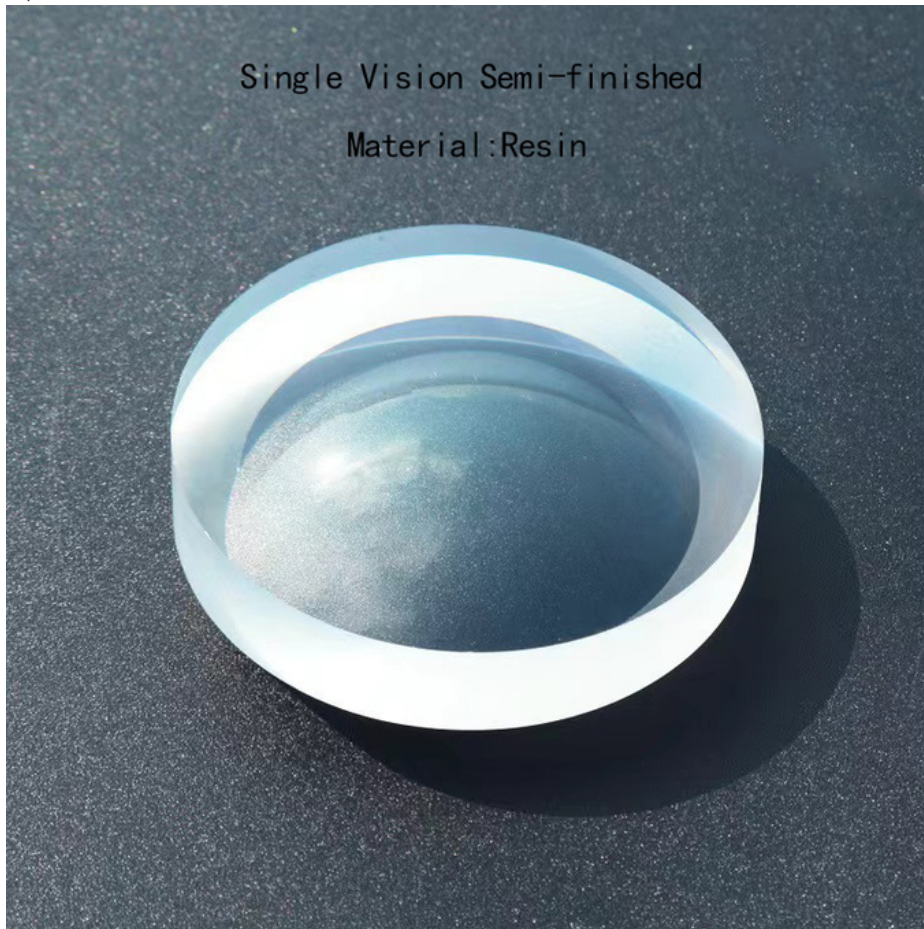

Progressive Semi-finished UC/HC/HMC Optical Lens White Lenses

Product Description:

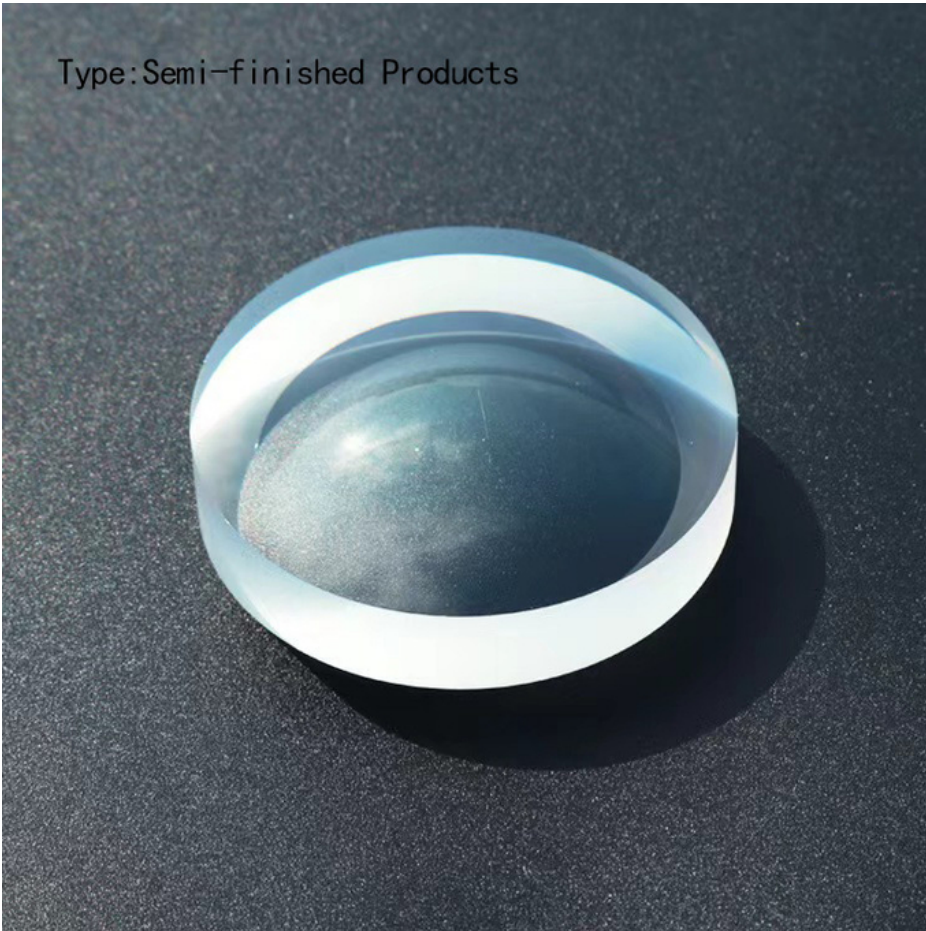

Our progressive lens features a superior design that offers a much more natural transition between different prescriptions, making it an excellent choice for those who prefer a more seamless visual experience. Unlike traditional bifocal lenses, our progressive lens has no visible line and provides a much more aesthetically pleasing appearance.

Our progressive lens is a multifocal lens that is designed to cater to different prescriptions, making it an ideal choice for those who have difficulty seeing objects at various distances. Whether you're reading, driving, or working on the computer, our lens provides a seamless visual experience that allows you to focus on the task at hand.

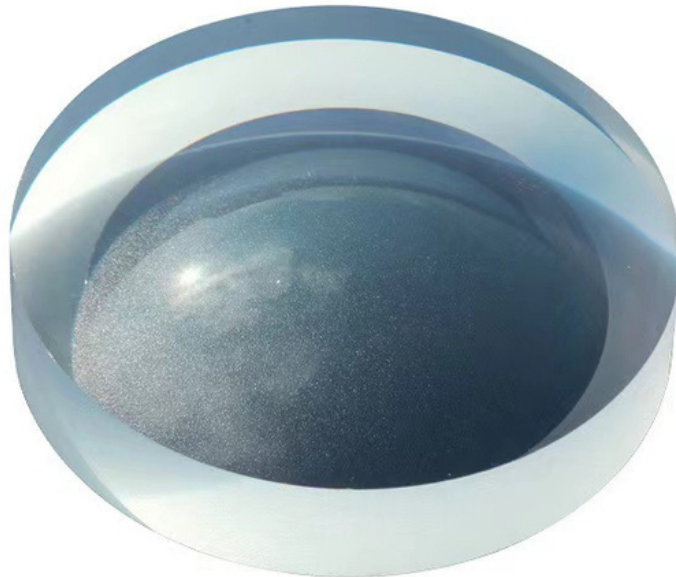

Overall, our progressive lens is an excellent choice for those who need a bifocal lens that offers superior quality and exceptional performance. Our lens provides unparalleled clarity and comfort, making it the perfect choice for anyone looking to improve their visual experience.

FAQ:

Q: What is the brand name of the progressive lens?

A: The brand name of the progressive lens is VOLGTLANDER.

Q: Where is the lens manufactured?

A: The lens is manufactured in China.

Q: Can these lenses be used for both distance and reading?

A: Yes, these lenses are progressive lenses, which means they have different zones for distance, intermediate, and reading vision. They provide a seamless transition between these zones for clear vision at all distances.
