Product Description

Product Description:

Our photochromic lens product boasts of a clear to dark color feature that automatically adjusts the tint of your eyeglasses depending on the amount of light present. This makes it perfect for people who constantly move from indoor to outdoor environments. With this photochromic lens, your eyes are protected from harmful UV rays while still allowing you to see clearly in any lighting condition. The lens diameter of our photochromic lens product is standard, making it compatible with most eyeglass frames available in the market. Our photochromic lens is also available in 1.56 lens index, ensuring that you get the thinnest and lightest lens possible without compromising on optical performance.
