Product Description

Product Description:

Our round top bifocal photochromic semi-finished lens product boasts a unique camber of 50/200/400/600, which ensures that the lens is perfectly shaped to fit your eyes and provide optimal vision. This camber design allows for a smooth transition of light, reducing glare and providing excellent clarity in any lighting condition.

Furthermore, our round top bifocal photochromic semi-finished lens product is highly scratch-resistant, ensuring that your lenses will remain in pristine condition even with frequent use. The high scratch resistance is achieved through the use of cutting-edge technology and materials, which provide superior durability and long-lasting performance.

Our round top bifocal photochromic semi-finished lens product is designed as semi-finished products, which means that they are partially processed and ready to be customized to your specific needs. This design allows for greater flexibility and customization, ensuring that you receive the perfect lens for your unique needs and preferences.

SANVISION OPTIC

FAQ:

Q: What is the brand name of these lenses?

A: The brand name of these lenses is VOLGTLANDER.

Q: Where were these lenses manufactured?

A: These lenses were manufactured in China.

Q: Are these lenses photochromic?

A: Yes, these lenses are photochromic.

Q: What is the benefit of using photochromic lenses?

A: Photochromic lenses darken when exposed to UV light, providing protection from harmful rays, and clear up when indoors or in low-light conditions, providing convenience and comfort.
