Product Description

Product Description:

Our progressive photochromic lenses not only provide the best vision, but they are also multifocal and convenient. You can rely on our lenses to withstand daily wear and tear without compromising their transition efficiency from clear to dark.

Our progressive photochromic lenses are available in semi-finished products that can be customized to meet your specific needs. The camber options of 50/200/400/600 provide versatility in lens design, making it easy to create the perfect lens for your unique prescription. Whether you need progressive photochromic lenses for everyday wear or for specific activities such as driving or sports, our lenses provide optimal clarity and comfort in any lighting condition. Say goodbye to the hassle of switching between multiple pairs of glasses and welcome the convenience of our progressive photochromic lenses.

FAQ:

Here are some frequently asked questions about VOLGTLANDER's Progressive Photochromic Semi-finished Lens:

Q: What are progressive photochromic semi-finished lenses?

A: Progressive photochromic lenses are lenses that have a multifocal that darkens in bright light and remains clear in low or no light. These lenses are often referred to as "transition lenses" because they transition from dark to transparent as lighting conditions change.

Q: Where is the progressive photochromic lenses product manufactured?

A: The progressive photochromic lenses product is manufactured in China.
