## Product Description

### Product Description:

Our domed anti-blue light photochromic lenses also come with a variety of coatings to further enhance your vision. You can choose between UC, HC or HMC coatings depending on your individual needs. These coatings help reduce flare, minimize reflections, and protect your lens from scratches and other types of damage.

Our domed anti-blue light photochromic lenses are also designed to be semi-finished, meaning it is partially finished and can be further customized to meet your specific needs. This allows for greater flexibility and customization and ensures that you get a lens that suits your unique needs.

Whether you're spending time indoors or outdoors, our photochromic lens products ensure you always look your best.

### Round Top Bifocal Photochromic Anti Blue Light Semi-finished

#### FAQ:

Here are the top 5 frequently asked questions about VOLGTLANDER's Round Top Bifocal Photochromic Anti Blue Light Semi-finished:

**Q: Where are VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished made?**

A: VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished are made in China.

**Q: Are VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished suitable for outdoor activities?**

A: Yes, VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished are perfect for outdoor activities because they darken in response to UV light. They provide protection from the sun's harmful rays and reduce glare, making them ideal for sports and other outdoor activities.

**Q: Can VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished be used for driving?**

A: Yes, VOLGTLANDER's round top bifocal photochromic anti blue light semi-finished are suitable for driving because they darken in response to UV light. However, it is important to note that they may not darken enough behind the windshield of a car, so it is best to test them out before using them while driving.
