Product Description

Product Description:

Our PC white film graying lenses are designed as semi-finished products and are suitable for a wide range of prescription requirements. The semi-finished design allows for customization and precise installation to ensure maximum comfort and visual clarity. Our PC white film greying lenses have a high index of 1.59, ensuring that they are thinner, lighter, and more comfortable to wear than traditional lenses. The high index also provides excellent optical performance, ensuring that your field of view is clear and accurate. Our PC white film graying lenses are also highly scratch resistant, ensuring that they retain their clarity and performance over time. They are also highly impact resistant, providing maximum protection for your eyes in the event of accidental impact or damage. Our PC White Lens Greying Lenses are the perfect choice for anyone looking for high-performance lenses that can adapt to changing lighting conditions and provide maximum protection for their vision.
