## Product Description

### 1.59 PC Progressive Semi-finished Anti Blue Light Photochromic

#### Product Description:

Our PC anti-blue light progressive grey lenses are highly scratch resistant, ensuring that they can withstand daily wear and tear. This means that you can rely on our products to maintain their clarity and durability, even with frequent use.

This eyeglass lens is also coated with HC/HMC, which provides a protective layer that minimizes glare, repels water, dust, and debris, and reduces eye strain. With their wide range of coatings, our photochromic lenses are ideal for those who need optimal visual clarity and protection.

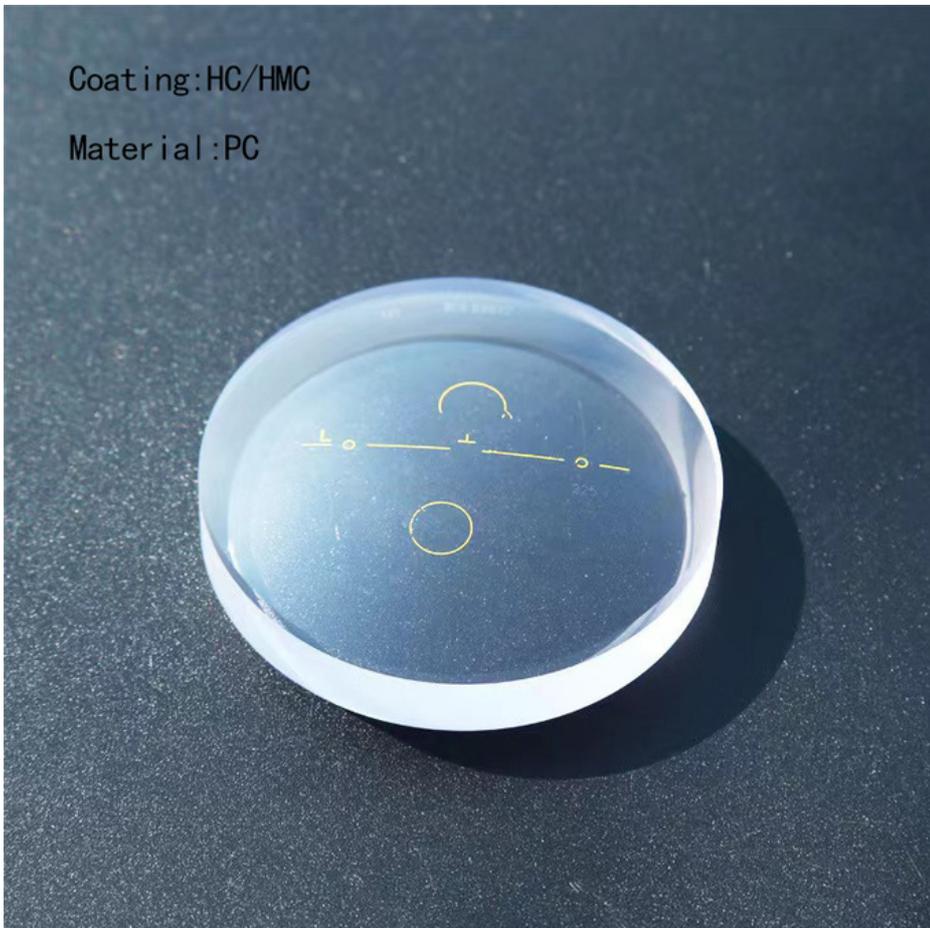

With a lens index of 1.59, our PC Blue Light Protection Progressive Greying lenses are thinner and lighter than conventional lenses. This means that our products are comfortable to wear, even for long periods of time. Plus, our lenses are compatible with most spectacle frames, ensuring that you can easily find the perfect pair for your style.
