Product Description

Product Description:

These glasses come in various colors, making it easy to find a pair that complements your personal style. The glasses are also unisex, so both men and women can enjoy the style and comfort of the Beta Titanium Glasses.

The size of these glasses is 51-18-145, which is a perfect size for most face shapes. The 51mm lens width provides ample coverage without overwhelming the face, while the 18mm bridge width ensures a comfortable fit.

The glasses feature IP-plating, which is a process that involves applying a layer of metal to the surface of the frame. This process not only makes the glasses more durable but also gives them a unique and stylish look. The IP-plating also helps to protect the glasses from wear and tear, making them a long-lasting investment.
