Product Description

Product Description:

Constructed with a beta titanium frame and TR material, these glasses are built to last. Beta titanium is a high-strength, lightweight material that is known for its resistance to corrosion, making it the perfect choice for eyewear. The TR material adds an extra layer of durability, ensuring that your glasses will withstand the wear and tear of daily use. The ZTO 1022 glasses feature a full frame design, providing maximum coverage and support for your lenses. The 51-20-144 size ensures a comfortable fit for most face shapes and sizes, while the trendy internet celebrity young style is sure to turn heads. These glasses also feature an ip-plating finish, giving them a sleek and modern look. The ip-plating process involves coating the glasses with a thin layer of metal, which not only enhances their appearance but also adds an extra layer of protection against scratches and other damage.
